

Test Methodology Change

Prealbumin

Test Methodology Change

Effective March 16, 2011

Effective March 16, 2011, St. Luke's Laboratory will upgrade the in house Prealbumin testing. This testing will be performed on new chemistry instrumentation resulting in a necessary reference range change.

New Prealbumin Reference Range:

16 – 36 mg/dL

Old Prealbumin Reference Range:

18 – 35.7 mg/dL

If you have questions, please contact K. Baer, M.D. (218)249-5751, Chemistry Medical Director or Mike Miller, MLS (ASCP) (218) 249-5207, Chemistry Technical Specialist.
